Data Sheet 211

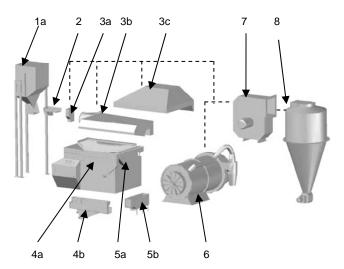

Gravity Separator GA 71

Grains or particles of almost identical size are fed continuously on the separating deck surface of the separator, providing a uniform bed of material over the deck surface.

The deck is fluidised by a completely uniform pressurised air system stratifying the light material to the top of the product bed and allowing the heavy material to contact the deck surface. The deck is inclined from side to side and inlet end to discharge end at adjustable angles.

The deck itself is powered by a fully balanced eccentric drive which moves the deck at low amplitude and high frequency up hill. The heavy material contacting a specially designed square wire deck surface moves up hill, while the light material fluidised by the air system moves down hill due to gravitational pull. A typically separation pattern is depicted below.

1. Intake pre-storage hopper

for intake adjustment between feeder-elevator and electro-magnetic feeder SP 18 incl. 3 level indicator switches.

Delivery with or without supporting legs

2. Electro-magnetic feeder type SP 18

for the trouble-free, continuous feeding of the machines

3a. Intake dust-aspiration hopper

light dust and fines removal from the product to be cleaned. Connection to central dust exhaust unit. Air requirement: 12 m³/min, 300 Pa

3b. Partial dust hood

In case of heavy dust formation, for the removal of dust from the incoming material and the light produce area. Connection to central dust exhaust or individual cyclone and ventilator. Incl. Intake dust-aspiration hopper and frame.

Air requirement: 113 m³/min, 300 Pa

3c. Full dust hood

complete closed; suction over the whole table area. With frame.

Air requirement: 275 m³/min, 300 Pa

- 4a. Discharge hopper for heavy product
- 4b. Vibrating discharge trough for heavy product with stone trap.
- 5a. Vibrating discharge trough for light product

5b. Bagging-off type hopper

for design with BASE STRUCTURE (required, if BAGGING-OFF type hoppers instead of discharge hopper will be supplied)

- 6. Cyclofan
- 7. Exhaust fan

With motor, without support structure

8. Dust separating cyclone with rotary valve

Technical data

-	
Capacity	
Corn, Wheat, Soybeans	4,0 t/h
Peas, Beans	3,0 t/h
Clover	1,6 t/h
Coffee (green)	2,7 t/h
Screen area	1,5 m²
Motors: (standard)	
Fan drive	4,0 kW
Reciprocating drive	0,55 kW
Air volume:	
Air requirements	250 m³/min
Dimensions	
Length	2033 mm
Width	1519 mm
Height	1175 mm
Total weight of separator	
Net	740 kg
Dynamic loading at 7-12 Hz:	
PH=+/- 200 N PV=+/- 95 N	(10N = 1 kg)

Technical data can vary for certain of the above due to continued development, or a different machine composition.
